

Where in the World?

Name _____ Date _____

WHAT DO YOU KNOW?

- 1 Are there longitude or latitude similarities in the distribution pattern? Does that mean anything?
- 2 How are species likely to have traveled these distances?
- 3 How species travel is often referred to as pathways. Which species were transported by the same pathway, and which pathway is the most common one?
- 4 What characteristics, if any, do the successful invasive species share?
